Using your i>clicker in class

You are required to purchase an i>clicker remote for in-class participation and voting.

Please bring your text and clicker to each class.

i>clicker is a response system that enables you to respond to questions I pose during class. You will be graded on this feedback and/or your in-class participation to potentially earn up to 40 points.

Please note that i>Clicker (original), i>Cliker +, and i>Cliker 2 devices are all acceptable for use in class. However, due to infrastructure issues at SVSU, we are NOT consistently compatible with REEF Polling phone apps (see below).

In order to potentially earn the points possible through i>clicker, you will need to register your i>clicker. Please register your remote before September 9, 2015 in the following fashion:

2. Click on the “Register Your i>clicker” button.
3. Complete the fields with your first name, last name, student ID, and remote ID.
   a. Your student ID is your SVSU username (for example, if your SVSU e-mail address is “chyla12@svsu.edu”, your SVSU username is “chyla12”).
   b. Your i>clicker remote ID is found on the bottom of the back of your i>clicker remote.
4. Important note about REEF Polling:

   Some of you may have the option of purchasing a “smart phone” application that is compatible with i>clicker called “REEF Polling”. While this system for using a smart phone like an i>clicker is nice... at this time, the infrastructure of the classroom Wi-Fi connections at SVSU are not stable enough to support REEF Polling. There are no guarantees that REEF Polling will work for us in the classroom on any particular day, so if you adopt REEF Polling, you do so at your own risk. In my opinion, it is safest to simply use the traditional i>clicker devices instead of REEF Polling.
